UJTL User Advisory Group Agenda

UJTL Tasks for Adjudication and Staffing Updates

UJTL Tasks for Adjudication

Currently in Initial FEA

SN 3.5.1.6 Provide Support to NASA Manned Space Flight Program

Type: NEW
Status: Initial FEA
Name / Rank: MAJ Scott Van Sant
Submitting Command: STRATCOM

Task Description:
To provide Department of Defense (DOD) operational support resources as requested by National Aeronautics and Space Administration (NASA) and validated by the DOD Manager for Manned Space Flight Support Operations. The DOD Manager will coordinate directly with necessary elements of the Military Departments, combatant commands, DOD agencies, and other appropriate departments and agencies of the US Government. Additionally, combatant commanders are responsible for planning for, supporting, and conducting the recovery of astronauts and space vehicles within the combatant commander's area of responsibility.

Task Note:
N/A

UJTL Tasks for Adjudication

Currently in Initial FEA

OP 5.2.4 Develop the Systems Perspective of the Operational Environment

Type: NEW
Status: Initial FEA
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:
Maintain current information early in the development of the systems perspective of the operational environment. The validity and sufficiency of linkages in the database is derived from the commander's latest guidance and from situation awareness. The processes and sub-processes used for updating are the same as those used to initially develop the systems perspective of the operational environment. Before the initial systems perspective of the operational environment process is complete, the SJFHQ (CE) -- or the Combatant Command HQ (CCHQ) central planning entity (eg, JPG) -- and external collaborative partners begin to modify the analysis. Examples of change which usually emerge from situation development and situation update include: a physical change in any of adversary's PMESII systems; a change in or more detailed commander guidance; rewrite of an OPLAN or CONPLAN; or a change in national policy toward any one or more countries in the operational environment. Any change may give rise to new effects not previously addressed, or new linkages for established effects that remain valid. Planners determine to what extent they should modify established effects and submit their revisions to the joint force commander for his approval. Working group members compare the revised effects with previously established effects to determine whether to establish new effect-node-action-resource-additional effects (ENAR2) linkages. This process occurs continually, during: pre-crisis; crisis action; and execution. It supports planning by providing revised analysis and linkages for effects-to-task development. In crisis action, the process used for updating is the same process used for initially developing the systems perspective of the operational environment. (ST 5.3.6)

UJTL Tasks for Adjudication

Currently in OPOC Coordination

SN 5.5.3.4 Direct the Operation of the Global Information Grid (GIG)

Type: NEW
Status: OPOC Coordination
Name / Rank: Mr. Jacque Stewart
Submitting Command: STRATCOM

Task Description:
Direct and lead the NetOps integrated approach to accomplishing two interdependent tasks necessary to operate the GIG-Enterprise Service Management/Network Management (ESM/NM) and Content Staging/Information Dissemination Management (CS/IDM). ESM/NM merges portions of information systems and network life cycle management functions (Fault, Configuration, Accounting, Performance, and Security) required for computing hosts, software applications and connected transmission systems, both wired and wireless, that carry voice, data, and imagery. It includes switched networks, data networks, video teleconferencing (VTC) networks, satellite communications networks, and wireless networks. CS/IDM provides DoD's war fighting, intelligence and business domains at all levels (strategic, operational and tactical) with awareness of relevant, accurate information; automated access to newly discovered or recurring information; and timely efficient and assured delivery of information in a usable format.

Currently in OPOC Coordination

ST 4.3 ~~Establish and Coordinate Distribution of Supplies/Services for Theater Campaign and Communications Zone (COMMZ)~~ Synchronize and Direct Global Distribution Joint Logistics Operations for the Theater

Type: MODIFY
Status: OPOC Coordination
Name / Rank: GG 14 Dan Williams
Submitting Command: JFCOM

Task Description:
To maintain the timely flow of stocks (all classes of supply in large and small quantities) and services (through Service component logistics organizations) to the joint operations area operational forces, in support of theater strategy and theater ~~campaigns and normal theater COMMZ support operations~~. To synchronize and integrate fulfillment of joint force requirements with employment of the joint force. It provides national resources (personnel and materiel) to support execution of joint operations. The ultimate objective of this process is the effective and efficient accomplishment of the joint force mission.

Task Note: This task includes the establishment of a joint total asset visibility capability in order to provide in-processing, in-staging, and in-transit visibility in order to manage the distribution of supplies/services. This task includes establishing a responsive distribution network using theater joint, multinational, or commercial transportation means (over ground, air, and sea lines of communications) that accommodate bulk movement, individual shipment of high-value class VIIx (aircraft engines), and class IX repair parts. This task includes in-transit visibility (ITV), command and control (C2), and business operational distribution of war reserve stocks in sufficient quantity, type, and location in depth throughout the theater to support combatant commander war-fighting strategies.

UJTL Tasks for Adjudication

Currently in OPOC Coordination

ST 5.3.2 Develop Theater Strategic Concepts

Type: MODIFY
Status: OPOC Coordination
Name / Rank: COL Paul Haveles
Submitting Command: JFCOM

Task Description: To develop the collective strategic concepts directed toward securing the objectives of national and multinational policy. Such concepts can be for the use of force or threatened use of force within the theater , theater strategic concepts included in the strategy are statements of what, where, and how operations are to be conducted in broad, flexible terms. Theater strategic concepts must relate ends, ways, and means, end state, objectives, efforts, tasks and actions to consider assigned objectives, the threat, and opportunities available in light of available resources. Included is an examination of risks involved in each proposed course of action. In the theater strategy, geographic combatant commanders translate the strategic direction contained within the national strategy into theater strategy and subsequent plans. To develop strategies that translate national and multinational direction into strategic concepts to meet strategicand joint operation planning requirements.using the effects based design. Theater Strategic Concepts are statements of intent as to what, where, and how operations are to be conducted in broad, flexible terms. These statements must incorporate a variety of factors including nuclear and conventional deterrence, current or potential alliances or coalitions, forces available, command and control (C2) capabilities, intelligence assets, mobilization, deployment, sustainability, and anticipated stability measures. Theater strategic concepts allow for the employment of theater nuclear forces, conventional and special operations forces (SOF) and capabilities, space assets, military assistance from all Services and supporting commands, multinational forces, and interagency resources in each COA. During COA and CONOPS development, understanding desired and undesired effects can help the JFC and staff refine their mission statement and the joint force components' tasks Theater strategic concepts should provide for unified action and strategic advantage. Strategic advantage is the favorable overall relative power relationship that enables one group, nation, or group of nations to effectively control the course of politico-military events. CCDRs use the advantages and capabilities of assigned, attached, and supporting military forces, as well as alliance, coalition, and interagency relationships and military assistance enhancements in theater as the basis of military power. CCDRs also consider and integrate the contributions of the other instruments of national power in gaining and maintaining strategic advantage. The CCDR plans joint operations based on analysis of national strategic objectives and development of theater strategic objectives supported by measurable strategic and operational desired effects and assessment indicators.

UJTL Tasks for Adjudication

Currently in OPOC Coordination

Cont'd: ST 5.3.2 Develop Theater Strategic Concepts

Task Note:

~~This task includes an examination of risks involved in each proposed course of action. In the theater strategy, geographic combatant commanders translate the strategic direction contained within the national strategy into~~ theater strategy and subsequent plans. Theater strategic concepts determine when, where, and for what purpose major forces will be employed and consider the following:(1) The law of war, implementation of national policies, and protection of US citizens, forces, and interests.(2) Integration of deterrence measures and transition to combat operations.(3) Adjustments for multinational, interagency, or IGO circumstances.(4) Identification of termination criteria.(5) Identification of potential military requirements across the range of military operationssupported by measurable strategic and operational desired effects and assessment indicators. (6) Support for security assistance or nation assistance.(7) Inputs to higher strategies or subordinate planning requirements.(8) Commanders and staffs can use commander's intent, a systems perspective of the operational environment, and an understanding of desired and undesired effects to coordinate and promote unified action with multinational and other agency partners.

UJTL Tasks for Adjudication

Currently in OPOC Coordination

ST 5.3.7 Develop Effect-Node-Action(s)-Resource(s)-Additional Effect(s) (ENAR2) Linkages

Type: NEW
Status: OPOC Coordination
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:
To develop procedures for a working group (WG) to link nodes, actions, resources and additional effects to established effects. `Before the WG is convened, SJFHQ (CE) -- or the Combatant Command HQ (CCHQ) central planning entity (eg, JPG) -- planners develop a range of actions that include: diplomatic, information, military, and economic (DIME). Planners also develop additional effects (desired and undesired) that may occur as a result of actions on nodes, and a list of resources. The WG develops effect-node-action-resource-additional effects (ENAR2) linkages. Smaller WGs (or teams) may be employed to streamline the effort. When the WG convenes, PMESII systems analysts nominate nodes for each effect. WG members approve or disapprove node nominations, based on effect-node link rationales. The WG also links actions, additional effects, and resources to the effect-node link to complete the process.

Task Note:

UJTL Tasks for Adjudication

Currently in OPOC Coordination

ST 5.6.4 Provide Multimedia Coverage of Military Activities in Theater

Type: NEW
Status: OPOC Coordination
Name / Rank: COL Stephen Campbell
Submitting Command: JFCOM

Task Description:
To manage and employ forces involved in the acquisition, production, transmission and distribution of multimedia products in support of the a combatant commander's public communication plan.

Task Note:
This task includes product acquisition coordination with the J3 for combat camera support.

UJTL Tasks for Adjudication

Currently in OPOC Coordination

OP 2.5.3.1 Provide Near Real-Time Situational Awareness for Decision-Makers and Planners

Type: NEW
Status: OPOC Coordination
Name / Rank: Mr. Tim Christi
Submitting Command: STRATCOM

Task Description:
Provide continuous near-real-time dissemination of diffused components of situational awareness to those personnel required to plan, execute, coordinate and direct both kinetic and non-kinetic operations deemed essential to the accomplishment of strategic and tactical operations and objectives. At a minimum, this information should include compiled all-source intelligence and the most current operational data displayed to the greatest extent possible via appropriate elements of the Common Operational Picture (COP).

Task Note:
N/A

UJTL Tasks for Adjudication

Currently in OPOC Coordination

OP 5.3.2.2 Conduct Planning with the Joint Interagency Coordination Group

Type: NEW
Status: OPOC Coordination
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:
To provide the linkage between the Combatant Commander and the Joint Interagency Coordination Group (JIACG), non-DOD organizations, the Joint Staff, and Office of Secretary of Defense (OSD), for facilitating definitions and clarification of strategic guidance, intent, aims, and end state. To provide links to multinational considerations and contributions ensuring that strategic policy planning guidance and intent at the national level are included in all CCDRs and JTFCDRs and coalition level implementing plans. To request agency/non governmental organization (NGO) inputs to the CCDR Pol/Mil Planner, for coordination of strategic and operational goals and activities, assets, personnel, and mission intent with that of the CCDR's planned end state.

Task Note: The headquarters, commands, and agencies involved in joint operation planning or committed to conduct military operations are collectively termed the Joint Planning and Execution Community (JPEC). The JPEC consists of the CJCS and other members of the JCS, the Joint Staff, the Services and their major commands, the combatant commands and their subordinate commands, and the combat support agencies.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 1.1 Determine Transportation Infrastructure and Resources

Type: MODIFY
Status: Final FEA
Name / Rank: Mr. Marcus Berry
Submitting Command: DCMA

Task Description:
To identify demands on common-user, organic, and contracted-commercial lift assets and en route support required to move forces to and from theaters in support of national military and theater strategies, operation plans, and multinational and regional needs.

Task Note:
Deployment/Redeployment planning is considered under SN 5, "Provide Strategic Direction and Integration."

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 2.2.4 ~~Manage DOD Intelligence, Surveillance, and Reconnaissance (ISR).Operate and Manage~~ Global Communications and Information Systems Manage DOD Intelligence, Surveillance, and Reconnaissance (ISR) Capabilities.

Type: MODIFY
Status: Final FEA
Name / Rank: GS-12 John Mastrianni
Submitting Command: STRATCOM

Task Description:
To manage (including planning, integrating, coordinating, and tasking) all aspects of Department of Defense (DOD) Intelligence, Surveillance, and Reconnaissance (ISR) activities in support of strategic and global operations. Task and coordinate ISR capabilities in support of strategic force employment (to include global strike and missile defense) and associated planning. ISR activities are coordinated to optimize the use of resources to achieve specified objectives and ISR plans are integrated with ongoing theater ISR operations. DOD ISR management activities are intended to integrate all national, theater, and allied capabilities to provide timely and actionable intelligence to satisfy the combatant commander's requirements.

Task Note:
N/A

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 3.2 Manage National Strategic Firepower

Type: MODIFY
Status: Final FEA
Name / Rank: Fred Sundberg
Submitting Command: US Army

Task Description:
To manage all aspects of national strategic firepower to include targeting and attack policy, target selection, planning applications, readiness, generate and disperse forces, and maintain weapon stockpiles. The term strategic firepower is a far-reaching concept and is used here to refer to any type of attack (i.e., nuclear, conventional, unconventional), both lethal and non-lethal, on targets of strategic value.

Task Note:
N/A

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 3.4.1 Provide ~~Strategic Air Defense~~ Aerospace Control

Type: MODIFY
Status: Final FEA
Name / Rank: Unknown
Submitting Command: NORAD/NORTHCOM

Task Description:

To protect all assets from air attack. This task involves integrating national and multinational ~~surveillance, detection, identification, tracking, and interception systems. Strategic air defense includes the use of aircraft, air defense missiles, air defense artillery, non-air defense assets in an air defense role, electronic warfare, and other lethal and non-lethal capabilities against all air threats including aircraft, naval vessels, air-to-surface missiles, and cruise missiles. This task centers on the protection of national centers of gravity, critical facilities, strategic reserves, population centers, and industrial capacity and infrastructure.~~ To provide surveillance and control of unwanted and unauthorized activity approaching and/or operating within the airspace of the United States and Canada. This requires capabilities to detect, track, intercept, identify, divert, monitor, shadow and destroy objects operating in airspace. This mission involves a continuum of combined air operations that includes air sovereignty operations to control access to sovereign airspace, air enforcement operations to control access within sovereign airspace and air defense operations to defend against air attack.

Task Note:

See SN 9.1.2.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 3.4.12 Provide Maritime Warning

Type: NEW
Status: Final FEA
Name / Rank: GS-14 David Koster
Submitting Command: NORAD/NORTHCOM

Task Description:
To provide processing, assessing, and disseminating of intelligence and information related to the respective maritime areas and internal waterways of, and the maritime approaches to, the United States and Canada, and warning of maritime threats to, or attacks against, North America to enable identification, validation, and response by national commands and agencies responsible for maritime defense and security.

Task Note:
N/A

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 3.4.2 Provide ~~Integrated Tactical Warning and Attack Assessment~~ Aerospace Warning

Type: MODIFY
Status: Final FEA
Name / Rank: GS-14 David Koster
Submitting Command: NORAD/NORTHCOM

Task Description:

~~To provide unambiguous, reliable, and survivable integrated tactical warning and attack assessment (ITW/AA) of atmospheric, space, and/or ballistic missile attack to President and Secretary of Defense, top echelon defense staffs and combatant commanders. ITW is a continuous, real-time process that provides warning after initiation of a threatening or hostile act based upon an evaluation of information from all available sources. AA is an evaluation of information to determine the potential or actual nature and objectives of an attack. AA also characterizes the attack as to origins, patterns, regions, sources, areas at risk, destruction potential, etc. ITW/AA provides information to support timely decisions during all phases of conflict. This task includes controlling ground and space based warning systems that provide data/information for ITW/AA of an atmospheric, space, and/or ballistic missile attack.~~ To process, assess, and disseminate intelligence and information related to man-made objects in the aerospace domain. This requires capabilities to detect, validate, characterize, assess and warn of attack against North America whether by aircraft, missiles or space vehicles. Aerospace Warning also includes the monitoring of global aerospace activities and related developments.

Task Note: N/A

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 3.4.2.1 Provide Integrated Tactical Warning and Attack Assessment (ITW&AA)

Type: NEW
Status: Final FEA
Name / Rank: GS-14 David Koster
Submitting Command: NORAD/NORTHCOM

Task Description:
To provide accurate, unambiguous and timely attack warning and attack assessment information to the government of the United States and the government of Canada. Notification of attack against North America is the first priority. ITW&AA information is also provided to top echelon defense staffs and combatant commanders in both countries. Integrated tactical warning involves warning after initiation of a threatening or hostile act based on an evaluation of information from all available sources. Attack assessment involves an evaluation of information to determine the potential or actual nature and objectives of an attack for the purpose of providing information for timely decisions.

Task Note:

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 4.3.2 ~~Coordinate Defense-Wide Religious Support~~ Provide Supplies and Field Services for Theater Forces

Type: MODIFY
Status: Final FEA
Name / Rank: COL Edward Fisher
Submitting Command: US Army

Task Description:
To coordinate comprehensive, inter-Service religious ministry support within DOD. This task includes reviewing plans and providing guidance in the provision of religious ministry across the range of military operations. To advise on the ecclesiastical, religious, and moral implications of Joint operations to achieve national security objectives; to advise on Joint religious ministry doctrine and policy, and coordinate chaplaincy issues with foreign military organizations. To provide, in the quantities and at the time and place needed, trained manpower, classes of supply, geospatial information services (formerly mapping, charting, and geodesy) and related field services for sustaining theater forces throughout a theater campaign or joint operation. Field services include water production, storage and distribution, mortuary affairs, laundry and bath support, maintenance and recovery, contracting and disposal of hazardous and non-hazardous material.

Task Note:
This activity includes requesting, receiving, producing, procuring, storing, protecting, relocating, and issuing supplies; creating, processing, submitting, and capturing ITV data; and providing personnel & logistic services. It also includes coordinating the build up of the necessary stockage levels in forward staging areas for conducting a theater campaign or joint operation.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 4.6.1.3 Provide Acquisition ~~Contract Management~~ Services Life Cycle Support

Type: MODIFY
Status: Final FEA
Name / Rank: Mr. Marcus Berry
Submitting Command: DCMA

Task Description:
To provide acquisition support and contract management services to procuring and program management offices from pre-contract award through production, deployment, sustainment and disposal.

Task Note:
This task includes providing pre-award product surveys, quality assurance (inspection and assurance), engineering, contract administration, pricing and negotiating, production ~~management~~, transportation management, property management, contract safety, supplier management, and financial management, flight test acceptance and delivery, property ~~disposal~~, industrial base capability analysis, and major defense acquisition program support.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 4.6.1.3.4 Provide Contract Administration Services

Type: NEW
Status: Final FEA
Name / Rank: Mr. Marcus Berry
Submitting Command: DCMA

Task Description:
To provide contract administration services to procuring and program management offices from contract award through production, deployment, sustainment and disposal.

Task Note:
This task includes providing pre-award surveys, quality assurance, engineering, contract administration, pricing and negotiating, production management, transportation management, property management, contract safety, supplier management, financial management, flight test acceptance and delivery, property disposal, industrial base capability analysis, and major defense acquisition program support.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 5.1 Operate and Manage Global ~~Strategic~~ Communications and Information Systems

Type: MODIFY
Status: Final FEA
Name / Rank: LCDR Robert Westendorff
Submitting Command: STRATCOM

Task Description:
To receive information and data on the strategic situation worldwide, including: combatant command, theater component command, and operational level command missions, disposition of friendly and enemy forces, strategic centers of gravity, and characteristics of the theater areas (worldwide).

Task Note:
This task includes translating the information and decisions into a usable form and promulgating, retaining, and disseminating it. The task includes informing, advising, and obtaining information and decisions on the worldwide situation, national security national defense, and national military strategies, and theater strategies and campaigns. Information and decisions will be acquired from and communicated to the President and Secretary of Defense and National Security Council advisory staff, Chairman of the Joint Chiefs of Staff, Military Departments and staffs, multinational commands and staffs, and other elements of the Department of Defense and government agencies as required. This task includes coordinating with friendly civilian government authorities as required towards a secure, redundant, global information network for unimpeded real-time information exchange with interagency and multinational partners. Includes access and security issues in the joint and interagency arena.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 5.1.7 Conduct Strategic Communication Planning

Type: NEW
Status: Final FEA
Name / Rank: GG-14 John Armeau
Submitting Command: STRATCOM

Task Description:
Provide strategic communication planning support that provides clear, cohesive, and synchronized US Government information to achieve strategic and operational level objectives. The strategic Communication process focuses on the integration of strategic and operational level Public Affairs and Public Diplomacy guidance, with information operations. Planning support involves identification of desired effects, associated themes, messages, actions, dissemination means, measures of performance, and measures of effectiveness. Planning should incorporate US Diplomatic, Information, Military, and Economic (DIME) instruments of power with an effects-nodes-actions-resources linkage. Participation of subject matter experts is required throughout the planning process. Important planning factors include current and accurate intelligence, national level guidance, public affairs guidance, Department of State guidance, clear Commander's intent, and information operations themes and messages.

Task Note:
N/A

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 5.4.2.1 Provide Joint Blue Force Situational Awareness

Type: NEW
Status: Final FEA
Name / Rank: GS-12 Jon Busick
Submitting Command: STRATCOM

Task Description:
Provide continuous 24/7 operational "Blue Force Tracking (BTF)"/"Joint Blue Force Situational Awareness (JBFSA)" support to the combatant commands, and as directed interagency, allied, and coalition users, in order to enable situational awareness, command and control (C2), and fratricide prevention in support of the war-fighter, Homeland Defense, and other combat operations; provide a combat development capability to integrate JBFSA devices; and support development of objective JBFSA capabilities consistent with "Net-Enabled Command Capability (NECC)".

Task Note:
Blue Force Tracking (BFT): “The employment of techniques to actively and passively identify and track U.S., allied or coalition forces for the purpose of providing the combatant commander enhanced battle-space situational awareness and reducing fratricide.” CJCSI 8910.01A, 30 April 2004 Joint Blue Force Situational Awareness (JBFSA): The collection and integration of capabilities provided by systems or tracking devices and transmission mediums employed to obtain, report, and share Blue Force identification, location, status and intent information. CJCSI 8910.01A.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 5.5.3 Direct the Defense of the Global Information Grid (GIG)

Type: NEW
Status: Final FEA
Name / Rank: Mr. Jacque Stewart
Submitting Command: STRATCOM

Task Description:
Direct and lead Information Assurance and Computer Network Defense (IA/CND) actions to protect, monitor, analyze, detect and respond to unauthorized activity within DoD GIG assets, information systems and computer networks. Employ IA protection activity and deliberate actions to modify an assurance configuration or condition in response to a CND alert or threat information. CND response actions include defensive and restoration actions. Provide assured system and network availability, assured information protection, and assured information delivery.

Task Note:
N/A

UJTL Tasks for Adjudication

Currently out for Initial Coordination

SN 6.6.7.1 Provide Industrial Base Capability Analysis

Type: MODIFY
Status: Final FEA
Name / Rank: Mr. Marcus Berry
Submitting Command: DCMA

Task Description:
To perform global industrial base capability, current and future technology assessment, surge capability, and defense critical infrastructure program analysis to facilitate adaptive solutions required by the Services, combatant commands, and other DOD customers.

Task Note:
This task includes analyzing, monitoring and evaluating ensuring the global industrial base current supply sources and potential suppliers of goods/services through in-plant presence or contract oversight at critical suppliers.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

ST 3.4 Coordinate Counterinsurgency Operations

Type: NEW
Status: Final FEA
Name / Rank: Mr. Greg Ginter
Submitting Command: CENTCOM

Task Description:
Plan, coordinate, synchronize and direct efforts to defeat insurgencies. This task may be conducted with assistance from host nation military and civilian assets and resources, in conjunction with host nation desires to conduct counterinsurgency operations.

Task Note:
N/A

UJTL Tasks for Adjudication

Currently out for Initial Coordination

ST 4.2.1.1 Provide ~~Initial Response Team Support~~ Contingency Contracting Administration Services

Type: MODIFY
Status: Final FEA
Name / Rank: Mr. Marcus Berry
Submitting Command: DCMA

Task Description:

To provide a deployable Initial Response Team (IRT) in support of a contingency operation to ~~determine initial support requirements by performing joint site surveys.~~ To provide contingency contract administration services (CCAS) for administering the Logistics Civil Augmentation Program (LOGCAP), Air Force Civil Augmentation Program (AFCAP), external support contracts, and weapon system support contracts, with place of performance in theater.

Task Note:

This task includes development of sites for follow-on Contingency Contract Administration Services (CCAS) resources and limited contract administration.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

ST 4.2.1.2 Provide Contingency Contract Administration Services Support

Type: MODIFY
Status: Final FEA
Name / Rank: Mr. Marcus Berry
Submitting Command: DCMA

Task Description:
To provide, through accepted delegation, contingency contract administration services (CCAS) support to augment ~~an Initial Response Team (IRT) or follow-on support at~~ a ~~supported~~ Joint Task Force Command or Service Component Command site.

Task Note:
This task also includes delegated contract administration at multiple sites and continuous coordination with supporting and supported commands and staffs.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

ST 5.3.5 Designate the Focus Area

Type: NEW
Status: Final FEA
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:
Combatant Commander designates a specific nation, region, contingency, or entity within the AOR that has likelihood of developing into a crisis; that can be subjected to a systems perspective view; and that has the potential for crisis response. The Combatant Commander will give general guidance regarding the focus area. SJFHQ(CE), in close coordination with the RCC J5 and JIACG, considers: the Defense Planning Guidance, Joint Strategic Capabilities Plan, and the RCC Theater Security Cooperation Plan; existing OPLANs, CONPLANs, Theater Security Cooperation Plans and intelligence estimates; and recent events and trends in theater. From these considerations, SJFHQ(CE) identifies a likely source/s of conflict (or contingency), defines the operational environment, the focus area, and presents it to the Combatant Commander for guidance and/or approval. Combatant Commander assigns the Focus Area(s) to the SJFHQ(CE) for development operational of the environment net assessment and operational design.

Task Note: No Task Note.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

ST 5.3.6 Develop a Systems Perspective of the Operational Environment

Type: NEW
Status: Final FEA
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:

To develop a systems perspective of the operational environment for the Combatant Commander's designated focus area. The SJFHQ (CE) will determine the level of effort and timeline required to produce a baseline of the systems perspective of the operational environment. Estimate the length of time needed to identify sources and availability of information pertinent to the focus area; develop an understanding of the interrelated systems (political, military, economic, social, information, and infrastructure) (PMESII) through the delivery of node and potential key nodes. Provide executive summaries, develop Blue / Red views and objectives. Updating of the systems perspective of the operational environment shall be maintained by planners and PMESII analyst as required.

Task Note: N/A

UJTL Tasks for Adjudication

Currently out for Initial Coordination

ST 5.4.3.1.1 Provide Contract Management Liaison

Type: MODIFY
Status: Final FEA
Name / Rank: Mr. Marcus Berry
Submitting Command: DCMA

Task Description:
To provide contract management ~~expertise~~ liaison and information to combatant commanders ~~and provide information~~ in order to make course of action decisions on contingency support.

Task Note:
This task includes engaging internal and external acquisition ~~expertise, inside and outside the~~ Agency, single point for coordinating combatant commander concerns, contingency planning, industrial surge, readiness analysis, and deploy as required with combatant command staffs.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

ST 6.2.7 ~~Integrate Personnel Recovery in Theater~~ Plan and Conduct Personnel Recovery

Type: MODIFY
Status: Final FEA
Name / Rank: Mr. Dan Williams
Submitting Command: JFCOM

Task Description:
To integrate all military, diplomatic, and civil personnel recovery capabilities into a coherent theater personnel recovery architecture that is able to report, locate, support, recover, and reintegrate isolated US military and DOD civilian and contractor personnel throughout the range of military operations.

Task Note:
This task includes coordination and promulgation of PR guidance and directives, in accordance with (IAW) DOD policy, doctrine, and tactics, techniques, and procedures (TTP), for forces in theater while planning for full spectrum personnel recovery (PR).

UJTL Tasks for Adjudication

Currently out for Initial Coordination

OP 3.1.6.4 Provide SJFHQ (CE) Joint Task Force (JTF) Support

Type: NEW
Status: Final FEA
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:
To provide SJFHQ personnel to the JTFC to assist in understanding the focus area, planning, directing, and coordinating the effects-based approach to joint operations. The JTF will exercise authority over and direct assigned and/or attached joint and multinational forces in the accomplishment of the assigned mission. The JTF commander employs assigned conventional forces, SOF and multinational forces to accomplish assigned missions with interoperable C2 system. These tasks are applicable across the full range of military operations.

Task Note:
N/A

UJTL Tasks for Adjudication

Currently out for Initial Coordination

OP 3.1.6.5 Deploy SJFHQ-CORE ELEMENT (SJFHQ-CE) as a Joint Task Force (JTF) Core

Type: NEW
Status: Final FEA
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:
To deploy the SJFHQ-CE and its Director or other Flag or General officer as the JTF Commander and augment the SJFHQ-CE to serve as the combatant commander's forward operational JTF command element

Task Note:
While the SJFHQ-CE can serve as the core of a JTF staff, it is not manned to be a fully functional operational headquarters without significant augmentation, mission specific plugs, and having appropriate liaison officers assigned.

UJTL Tasks for Adjudication

Currently out for Initial Coordination

OP 4.4.6 Provide Religious Ministry Support in the Joint Operations Area

Type: MODIFY
Status: Final FEA
Name / Rank: LTC Guy Glad
Submitting Command: CENTCOM

Task Description:
To coordinate the providing of religious support among components of a joint task force (JTF). This task includes identifying professional assistance, program funding, and logistics requirements to support personnel within the JTF. Additionally, this task includes establishing and coordinating a Task Force Religious Ministry Support Plan that will provide chaplain coverage to all elements. Additional activities include providing required religious support assets to support planned or ongoing operations, assisting nongovernmental organizations (NGOs) with humanitarian assistance (HA) programs, and enemy prisoners of war to receive appropriate religious ministry support. Finally, the task includes providing advice to the commander on moral/ethical issues and indigenous/cultural customs that may impact planning and execution of an operation or campaign

Task Note: N/A

UJTL Tasks for Adjudication

Currently out for Initial Coordination

OP 5.2.1.1 Conduct Effects Campaign Assessment

Type: NEW
Status: Final FEA
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:
To provide the commander an assessment of progress toward achieving campaign objectives based on the current and projected assessment of desired and undesired effects attainment, task accomplishment status, and required time lines, with recommendations for corrective action where appropriate. Campaign assessment helps to identify any “delta” between current campaign status and required progress based on campaign design. The results of the campaign assessment process provides the basis for alternative course of action development, resource re-allocation, development of branch and/or sequel plans, and/or adjustments to campaign plan and its decision points.

OP 5.2.1.2 Conduct Effects Assessment

Type: NEW
Status: Final FEA
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:
To provide the commander with the current status of progress toward or away from attaining desired and/or undesired effects developed in support of theater strategic objectives. Effects assessment is the process of analyzing trends of changes in system behaviors or capabilities that are exhibited as a result of military or non-military activities conducted by the joint force commander, coalition forces, and non-DOD elements of national power. Trend analysis for effects assessment is based upon indicators and measures of effectiveness developed during planning.

Task Note:

OP 5.2.1.3 Develop Effects Assessment Criteria

Type: NEW
Status: Final FEA
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:
To develop criteria for assessing measures of effectiveness (MOE), MOE indicators, and effects. Assessment criteria are the data thresholds, metrics, and relative weights associated with each effect/effect element that provide the baseline for identifying acceptable progress in achieving planned objectives. When approved by the commander, assessment criteria form the basis of the effects assessment process.

Task Note:

OP 5.3.1.2 Identify Desired and Undesired Effects in Developing Operational Objectives

Type: NEW
Status: Final FEA
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:
To identify and develop desired and undesired effects based on strategic theater and operational objectives. Desired effects describe specific conditions of system behaviors or capabilities of an adversary that, if attained and maintained, could be expected to reflect the accomplishment of intended objectives. Undesired effects describe system behaviors or capabilities of an adversary that, if attained, would be adverse to the accomplishment of the intended objectives. Effects provide the construct for the assessment of progress toward or away from achieving campaign objectives and provide focus for the planning of DOD and complementary non-DOD or coalition activities. Effects should be limited to the number required to achieve the objective, be observable, and describe measurable target system behaviors or capabilities.

Task Note: An "effect" is a physical or behavioral state of a system that results from an action, a set of actions, or another effect. A desired effect represents a condition for achieving an associated strategic or operational objective. Desire and undesired effects can be created directly or indirectly. Thinking in terms of desired and undesired effects helps commanders and their staffs focus strategic and operational objectives, understand the conditions necessary for success, determine the sequence of actions to create these conditions, and develop more precise assessment measures. (JP 3-0 and JP 5-0 definition)

OP 5.3.1.4 Develop Measures of Effectiveness (MOE) Indicators

Type: NEW
Status: Final FEA
Name / Rank: CTR Jack Schultz
Submitting Command: JFCOM

Task Description:
Measures of Effectiveness (MOE) codify those trends of change in system behaviors or capabilities that will be used to assess progress toward or away from achieving effects in support of strategic theater objectives. The intent in developing MOE is to identify the indicators of whether joint force or coalition activities are producing the desired effects. MOE indicators are the observable, measurable system behaviors or capabilities that will provide the data required to conduct MOE trend analysis. MOE indicators and effects Assessment criteria are the data thresholds, metrics, and relative weights associated with each effect/effect element that provide the baseline for identifying acceptable progress in achieving planned objectives. These indicators may be tied to specific nodes in order to focus intelligence, surveillance, and reconnaissance planning. When developed, Fully developed, MOE indicators are provided the appropriate guide lines for developing intelligence collection activity and form the basis for an effects assessment collection plan.

OP 5.6.6 Synchronize Computer Network Warfare (NW) Capabilities

Type: NEW
Status: Final FEA
Name / Rank: CDR Tony Boex
Submitting Command: STRATCOM

Task Description:
Synchronize operational and tactical computer network warfare (NW).

Task Note:
NW is the employment of computer network operations capabilities that support the employment of computer network operations with the intent of denying adversaries the effective use of their computers, information systems, and networks; while ensuring the effective use of our own computers, information systems, and networks.
